CPD	Continuing Professional Development
ECTS	European Credit Transfer and Accumulation System
EEA	European Economic Area
EU	European Union
NA	National Association
OT	Occupational Therapy or Therapist/s
SIG	Special Interest Group
WFOT	World Federation of Occupational Therapists

Summary of the occupational therapy profession in Europe 2018

Message from the COTEC Executive

The Council of Occupational Therapists for the European Countries (COTEC) was established in 1986 with the purpose of co-ordinating the views of the national associations of occupational therapy in Europe. The aim of COTEC is to enable national associations of occupational therapists to work together to develop, harmonise and improve standards of professional practice and advance the theory of Occupational Therapy throughout Europe to best address the social and health issues affecting European citizens.

COTEC strives to make Occupational Therapy visible, valued, accessible and available for all European citizens by supporting its members and by collaborating on European level. COTEC is the European organization for all Occupational Therapists through their National Associations, with the purpose of ensuring an adequate number of high quality occupational therapy practitioners and services in Europe. COTEC is a non-profit organisation (NGO) and represents 30 European Occupational Therapy Associations and more than 180,000 Occupational Therapists.

The Summary of occupational therapy profession in Europe is compiled and updated annually based on information supplied by the Member associations of COTEC. The Summary includes statistical information of occupational therapy and professional associations as well as information about education and regulation of the profession. This information can be a valuable tool for promoting occupational therapy as well as providing information for policy makers in both health and social arenas at national and European level. COTEC Executive Committee is pleased to observe the increasing number of occupational therapists across Europe.

In 2018 point 8 was added in section I. referring to further information from the European commission about the occupational therapy profession. This contains data about profession titles in European countries, job descriptions, mobility and more.

COTEC Executive Committee is grateful for the support of its Member associations on compiling the data for this document and is pleased to publish the Summary of Occupational Therapy Profession 2018.
